

Assignment -4

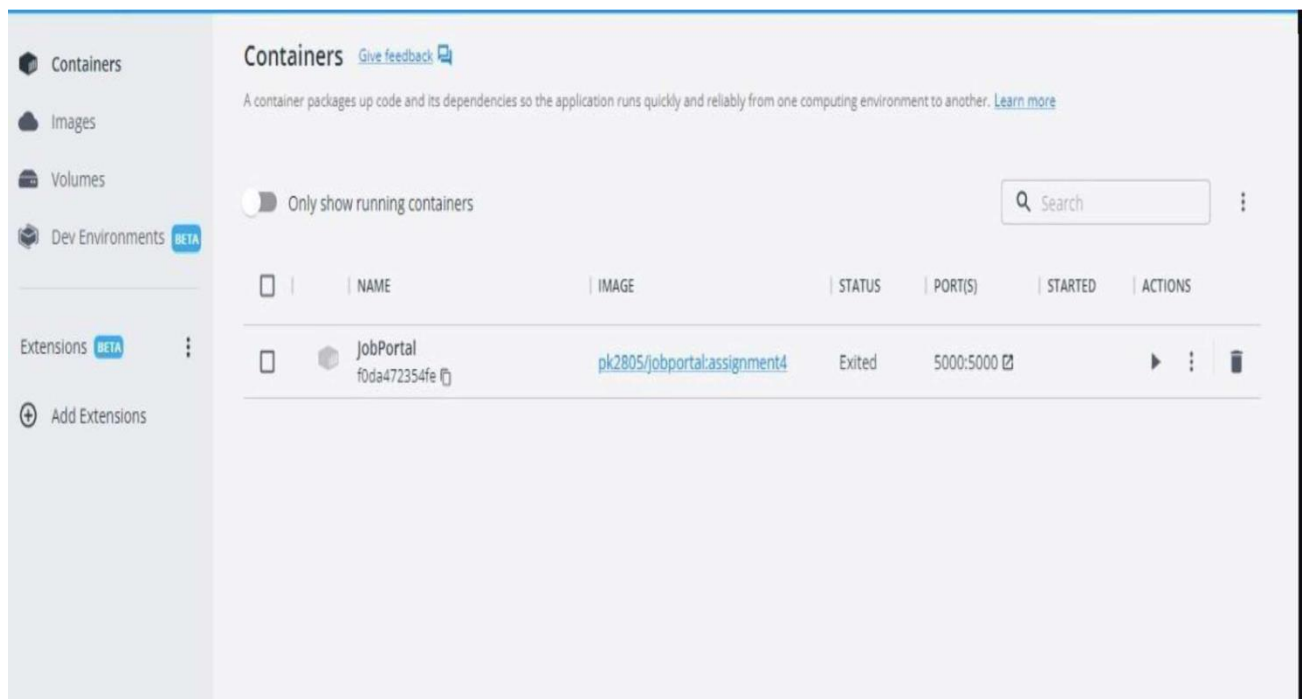

Inventory Management System for Retailers – Kubernetes / Docker

Assignment Date	07 November 2022
Student Name	GURUMOHAN N
Student Roll Number	61771921017
Maximum Marks	2 Marks

Question-1:

1. Pull an Image from docker hub and run it in docker playground.
2. Create a dockerfile for the job portal / flask application and deploy it in Docker desktop application.
3. Create a IBM container registry and push docker image of flask application or job portal app.
4. Create a Kubernetes cluster in IBM cloud and deploy flask application image or job portal image and also expose the same app to run in Nodeport.

Step 1: Pull an Image from docker hub and run it in docker playground.

[node1] (local) root@192.168.0.13 ~
$ docker run hello-world

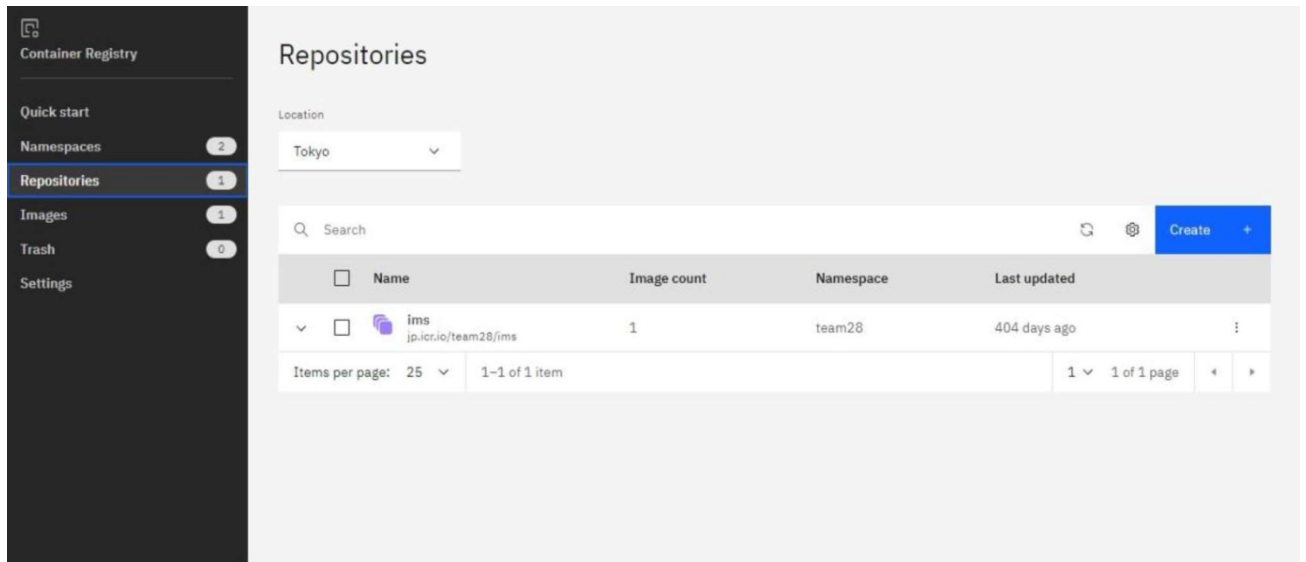

Hello from Docker!
This message shows that your installation appears to be working correctly.

To generate this message, Docker took the following steps:
1. The Docker client contacted the Docker daemon.
2. The Docker daemon pulled the "hello-world" image from the Docker Hub.
```

Step 2: Create a dockerfile for the job portal / flask application and deploy it in Docker desktop application.

```
Dockerfile > FROM
1 FROM python:3.10.6
2 WORKDIR /app
3 COPY requirements.txt ./
4 RUN pip install -r requirements.txt
5 COPY . .
6 EXPOSE 5000
7 CMD ["python", "./app.py"]
```

Step 3: Create a IBM container registry and push docker image of flask application or job portal app.

```

C:\Users\asus>Select C:\WINDOWS\system32\cmd.exe
